

TRANSPORT NH
GOING PLACES

Transport NH is leading a network of organizations working to create a safe, well-maintained and integrated transportation system that gives people options for getting around.

We call this effort the
Statewide Transportation Initiative:
Helping New Hampshire Arrive
In the 21st Century

We envision a system that attracts and retains businesses and skilled workers, provides access to employment, increases public health through active living and access to healthcare, provides community connections for seniors and people with disabilities, and protects the environment by reducing sprawl and cutting pollution.

Network actions in progress:

Legislative event, January 2015, on the topic of Safe travel for all road users

Updating NHDOT Balanced Score Card to include bicycle & pedestrian metrics and improved transit metrics

First ever statewide transit study, providing a baseline for current service, identifying gaps & unmet need, and providing recommendations

Restoration of state funding for transit

As backbone of that network, Transport NH

Guides vision and strategy

Supports aligned activities

Helps establish shared metrics

Builds public will

Advances policy

Mobilizes funding

The backbone helps the network
focus its power

How can you help?

Stay informed

Broaden the conversation

Publicize your successes

Find partners in the network

Our monthly newsletter tells you how.

This newsletter is a resource for organizations working to create a safe, well-maintained and integrated transportation system that gives people options for getting around.

The NH Statewide Transportation Initiative

**Monthly News and Call for Action
September 2014**

When transportation is working well, it's almost invisible. People go from home to work and back. Goods get delivered. People go to stores to buy things. Doctors see patients. People visit offices and
